

## + summary

Work to provide rapid, robust and responsive front- and back-end web development solving a myriad of problems across an array of fields. Previously, collaborated and consulted with startups and non-profits within the healthcare industry to improve patient access and experience, as well as empowering healthcare providers to generate improvements in the cost and quality of healthcare.

## + projects

### Crypton 05/18

Tool for personal investors to receive information around cryptocurrency, track their investments across exchanges, as well as creating a community around investing.

Stack: Node.js, Express, React, Bulma, and RESTful API

### Diamond Match 03/18

My game will be able to be played initially by one player and have 8 questions which will be checking to see if they can identify 8 cuts of diamonds that are presented at random.

Stack: HTML, CSS, and Javascript

## + employment

### Phreesia New York, NY

Associate Implementation Consultant

03/17 to 12/17

- Conduct implementation tasks including end-user training go-live support and post-go-live optimization.
- Perform gap analysis to identify implementation issues, and consult on options to address issues.

### HASA San Antonio, TX

IT Intern

02/17 to 03/17

- Supported CEO & Director of Business Development with product demos and meetings with current/potential clients, verified over 5,000 patient merges of received data, and researched MACRA, SSO, as well as other health-tech/policy

### SPRIM Singapore

Health Market Research Intern

01/16 to 08/16

- Assisted with market presentations to identify competitors
- Verified over 10,000 data entries of corporate clients/contacts, and executed market automated email campaigns via Marketo.
- Supported the marketing consultant in a database transition to Microsoft Dynamics CRM

## + awards

ColonyJS Hackathon ·

"Meta Colony"

Award/Honorable

Mention

07/18

The bridge between the user-facing and the infrastructure-facing layers of Colony. The colonyJS library allows developers to leverage the power of Colony's smart contracts in their own applications. Link to Repo. TeamMate: Kevin Lu (Senior Developer)
